Understanding Continuing & Adult Education and

1 Workforce Offices, we bring a core understanding of Academic Structure and its impact to the cross-functional requirements between Student Records, Financial Aid and Student Financials.

2 Utilizing 35/20 and other cost effective solutions, our goal is to support the learning of the product and less dependant on consulting but have support readily available.

3 We understand Campus Solutions and understand the robust functionality that PeopleSoft is capable of delivering

Continuing & Adult Education Initiative

As a Campus Solutions focused practice, HTS has launched a Non Credit: Continuing Education and Adult Education initiative. We understand firsthand the obstacles and challenges that these offices face when trying to play a part of a larger campus solutions implementation. The purpose of the initiative is to assist and guide the adult and continuing education departments to build an effective campus solutions application to meet their needs. The past 10 years we have seen these programs be overshadowed or relegated to later phases, this has been a failure by projects and consultants who failed to understand the impacts of their design of academic structure and business processes on adult and continuing education programs. Our solution allows these offices the ability to have consultants who understand their dynamic needs and requirements and are capable of utilizing PeopleSoft's robust delivered functionality. Within our practice we have senior consultants who have worked in these offices and can provide insights only gained by managing these office's daily challenges.
